

# NetScaler: One Device, Every Need Guiding Enterprise IT to New Heights.

# Patient Data: Safe And Secure

Let's face it: sensitive data is more vulnerable than ever. Citrix's NetScaler App Firewall helps IT security leaders achieve application security and performance optimization capabilities. Time to give your data center a clean bill of health:

- + Hybrid Security Model: Complete protection against all modes of attack (both positive and negative).
- + XML Protection: Block requests that don't meet XML criteria.
- + Tailored Security Policies: Customize to the unique requirements of each application.
- + Layer 7 Attack Protection: HTTP protocol validations, DoS protection, rate limiting, and more.

# A+ Performance

It's a fast-paced world. Citrix NetScaler, partnered with ePlus, meets the demands of modern content and service delivery needs. Just a few ways NetScaler speeds up load time to help organizations... make the grade:

- + Application acceleration, compression, and caching in one integrated appliance
- + Comprehensive L4-7 traffic management
- + Caching, TCP buffering, TCP session consolidation, compression, and SSL load
- + Fastest web application and highest level of security\* (as tested by NSS labs)

# Consolidate Your Network Across The Board

It's no secret virtualization will transform your data center. Private clouds allow for cost savings, consistent SLAs, and security enhancements. But what about the rest of your infrastructure? ADC virtualization can have a profound business impact, and NetScaler is helping connect the pieces:

- + Optimize application availability through L4-7 load balancing
- + Get an integrated application firewall to boost performance and security
- + Minimize data center TCO
- + Benefit from a cloud-enabled ADC for greater agility, elasticity, and cost efficiency

# Enterprise-Level Cost Savings

Money... out of the bank. From high device and licensing costs to hardware troubleshooting and scaling — enterprise organizations are constantly looking for ways to reduce operating and capital expenses. Just a few ways a reliable ADC, like NetScaler, can help:

- + Scale your network up or down without additional hardware costs
- + Benefit from fewer devices, more reliable applications, and streamlined IT tasks
- + Reduce resource management requirements
- + Ensure exceptional application performance for customers, partners, and internal users

# The Roadblocks Facing Today's Enterprise Organizations Can Feel Insurmountable:

Security threats around every corner, rising infrastructure costs, and performance pot holes. Thanks to ePlus, you've got a trusted IT integrator. And thanks to Citrix clearing the way with NetScaler, you've got an ADC that delivers flawless performance and cost savings that'll help carry your business well into the future.
